

# RDM@UNSW

RESEARCH DATA MANAGEMENT

How UNSW implements the 5 safes

# Research Technology Services

Compute · Data · Community

[restech@unsw.edu.au](mailto:restech@unsw.edu.au)

<https://research.unsw.edu.au/research-technology-services-restech>

Level 3, Chemical Science (F10)

## Compute

The ResTech compute team provides support for those who have problems too big for the computer at your desk.

## Data

UNSW provides a number of platforms for storing, capturing and sharing your research data.

## Community

The ResTech Community team aims to build a strong and connected research network within UNSW.

## Managing the Risk of Disclosure: the Five Safes Framework

From [Australian Bureau of Statistics website](#):

### Balancing disclosure risk and data utility

Confidentiality is breached when a person, group or an organisation is re-identified through a data release or when information can be attributed to them. The likelihood of this happening, or *risk of disclosure*, is not easily determined. Implicit in this is that the consequences of disclosure are always damaging (to some extent) to the individual or organisation. It is difficult to ascertain the degree of damage; mostly because people differ in the importance they place on information (i.e. what may be considered highly confidential to one person is of no consequence to another). The ABS assumes all information it collects to be potentially sensitive and manages it accordingly.

<https://www.datagovernance.unsw.edu.au/managing-risk-disclosure-five-safes-framework>

# SAFE PEOPLE

Is the researcher appropriately authorised to access and use the data?

UNSW has several ways to help ensure Safe People is handled:

- Availability of Data Management (and upcoming cyber-security) training
- Use of Data Management plans specifying related staff and their roles
- Applying Data Management Plan roles to Data Archive and other services
- User Access Reviews
- [Acceptable Use of UNSW Information Resources Policy](#)

# KEY POLICIES AND DOCUMENTS

## Cyber Security Policy

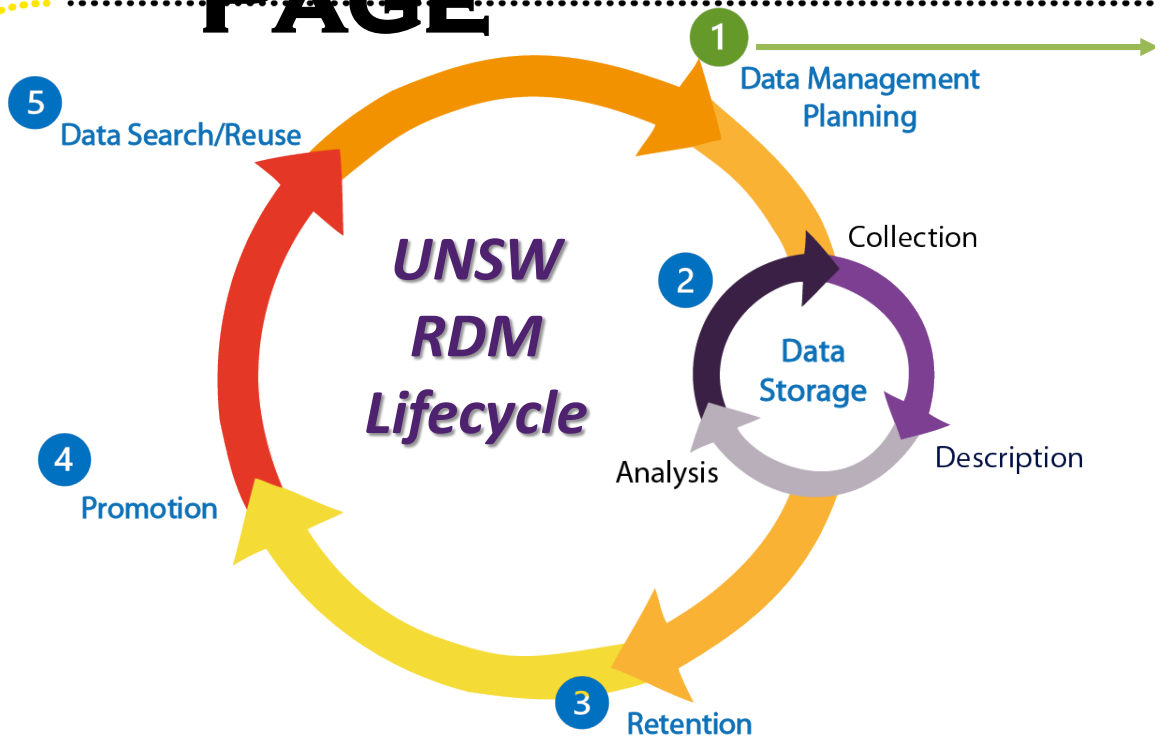

Version	Approved by	Approval date	Effective date	Next full review
4.0	Vice-Chancellor	18 November 2022	18 November 2022	November 2025
Policy Statement				
<b>Purpose</b>	<p>This policy sets out the principles for ensuring that UNSW Information Resources (UNSW Information Services and UNSW Information Assets) that hold UNSW Digital Information are appropriately protected.</p> <p>UNSW must ensure that:</p> <ol style="list-style-type: none"> <li>accountability and responsibility are allocated for the governance and management of cyber security.</li> <li>UNSW Information Resources are identified and assessed for cyber security risk and appropriately protected from cyber security events.</li> <li>cyber security events are detected and responded to in a timely manner.</li> <li>UNSW Information Resources recover from cyber security incidents in a secure and timely manner.</li> </ol>

# SAFE PROJECTS

Is the data to be used for an appropriate purpose?

- UNSW Ethics covers appropriate use of data in ethics-related projects
- Open Data Policy and UNSW Library assist with licenses for Open data
- Data is classified by Sensitivity to assess Risk, with more risky data requiring more controls

# ResToolkit

[ResToolkit.unsw.edu.au](https://ResToolkit.unsw.edu.au)

Create projects with basic Data Management Planning details

- Pre-filled details from HDR and grants system
- Links out to DMPOnline
- Provision a UNSW Data Archive folder
- Provision a OneDrive folder
- Provision a Microsoft Team

The screenshot displays the ResToolkit web application interface. At the top, there is a navigation bar with the UNSW Sydney logo and the text 'ResToolkit'. Below this, a section titled 'My Projects' contains search and sort controls. The search bar is set to 'Title' and the sort dropdown is set to 'Project Title'. A project entry for 'ResToolkit test' is shown with the following details: Project Type: Manual, Role: LCI, Last Modified: 28/10/2022 02:58 PM, and RDMP ID: D0416750. The RDMP ID is circled in red. The RDMP Status is 'Under Amendment'.

# CLASSIFYING YOUR DATA

## CLASSIFYING YOUR RESEARCH DATA

Types of Research Data	Highly Sensitive	Sensitive	Private	Public
Data containing information involving minors/at-risk participants or culturally sensitive groups	The data is classified as <b>Highly Sensitive</b>			
Data subject to regulatory controls	The data is classified as <b>Highly Sensitive</b>			
Data containing personal information	The data is classified as <b>Sensitive or higher</b>			
Data containing confidential information	The data is classified as <b>Private or higher</b>			
Data collected from human and/or animal participants	The data is classified as <b>Private or higher</b>			
Unpublished research data	The data is classified as <b>Private or higher</b>			

It is possible that the data may have other requirements that are not covered in the current data classification. Please contact [rdm@unsw.edu.au](mailto:rdm@unsw.edu.au) if you have such unique requirements or doubts about classifying your data.

OneDrive is a UNSW-supported research data storage platform for the above data classifications. For more information, go to <https://research.unsw.edu.au/research-data-management-unsw>

# CLASSIFYING YOUR DATA

## ASSESSING THE CONFIDENTIALITY RISK OF YOUR DATA

### Number of Individuals involved

	Less than 1000	1000 to 10,000	More than 10,000
Highly Sensitive Data	Medium Risk	High Risk	High Risk
Sensitive Data	Low Risk	Medium Risk	High Risk
Private Data	Low Risk	Medium Risk	Medium Risk

There may be other factors affecting the risk level of your data such as external requirements, commercial, defence, or cultural risks. Contact [rdm@unsw.edu.au](mailto:rdm@unsw.edu.au) for assistance with classifying your data.

# SAFE SETTINGS

Does the access environment prevent unauthorised use?

- UNSW Provides various standard platforms that are security-tested, use UNSW identity, store data within Australia, etc.
- UNSW ERICA being developed to provide high-end data security
- Cyber-security team create security standards, monitor intrusions, respond to threats, and provide expertise
- UNSW Provides physical security on its campuses and locked rooms where needed. UNSW Data Centres have restricted access

# CHOOSING WHERE TO STORE

## YOUR DATA

### STORING YOUR RESEARCH DATA

Storage Platforms	KEY SUPPORTED				
	UNSW OneDrive & Teams	UNSW eNotebook	Data Archive	Dropbox	Local Storage <sup>1</sup>
Storage Type	Day-to-Day	Day-to-Day	Long-Term	Day-to-Day	Day-to-Day
Suitable Data Classification	●●●●	○●●●	○●●●	○●●●	○●●●
Stored in Australia	✓	✓	✓	✗	🖥️
Backup & Disaster Recovery	✓	✓	✓	✗	✗
Syncing with Local Copy	✓	Not Applicable	Not Applicable	✓	Not Applicable
External Collaborator Access	✓	✓	✗	✓	✗
Storage Limit <sup>2</sup>	5TB/User & 25TB/Team	Unlimited	Unlimited	💰	🖥️
Version Control	✓	✓	✓	✓	✗
Recovery from Deletion	60 Days	No Data Deletion	No Data Deletion	💰	✗
Post-Project Data Retention	>7 years	Indefinitely	Indefinitely	💰	🖥️

<sup>1</sup>Local devices vary greatly in their configuration and security. Contact [rdm@unsw.edu.au](mailto:rdm@unsw.edu.au) to find out which data classification is suitable for your local device (e.g., desktop, laptop & tablet).

<sup>2</sup>Total and individual file size may impact the platform choice. Contact [rdm@unsw.edu.au](mailto:rdm@unsw.edu.au) for advice on handling large file sizes.

● Highly Sensitive Data   ● Sensitive Data   ● Private Data   ● Public Data   💰 Paid service   🖥️ Depends on the local storage configuration

For Sensitive and Highly Sensitive data, data encryption and/or other settings may be required. Please refer to the UNSW Data Handling Guidelines for more information. If you have any Highly Sensitive data, or research data management inquiries, please contact [rdm@unsw.edu.au](mailto:rdm@unsw.edu.au)

# ONEDRIVE

## Why:

- Safe for High Sensitivity data (talk to us!)
- Free
- Can share data to external and internal users

## What:

- Online file storage, copies to your devices
- 5+ terabytes of data per user
- Edit office files online with other users

## How:

- <http://myoffice.unsw.edu.au/>

# MICROSOFT TEAMS

## Why:

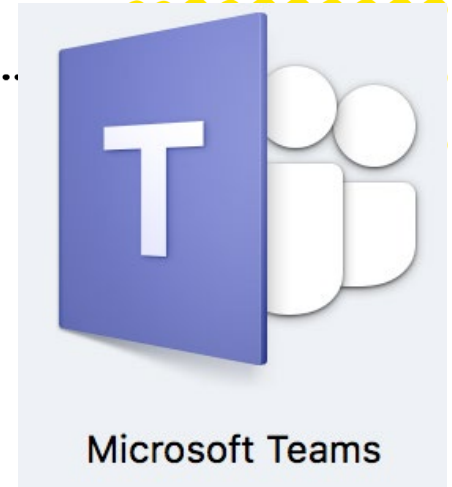

- Online collaboration tool for UNSW staff
- Free
- Can add external guest users

## What:

- Create your own Team
- Comes with Chat, File storage, Video conferencing, and other functions

## How:

- <http://teams.microsoft.com/>

# DATA ARCHIVE

## Why:

- Long-term storage needed to comply with grants, policies, regulations
- Free, no quotas
- Storing important data that may be needed later
- Frees up space on other storage locations

## What:

- Storage for any size and number of files, permanently
- Multiple copies kept in different physical locations in NSW
- Available to download within 48 hours

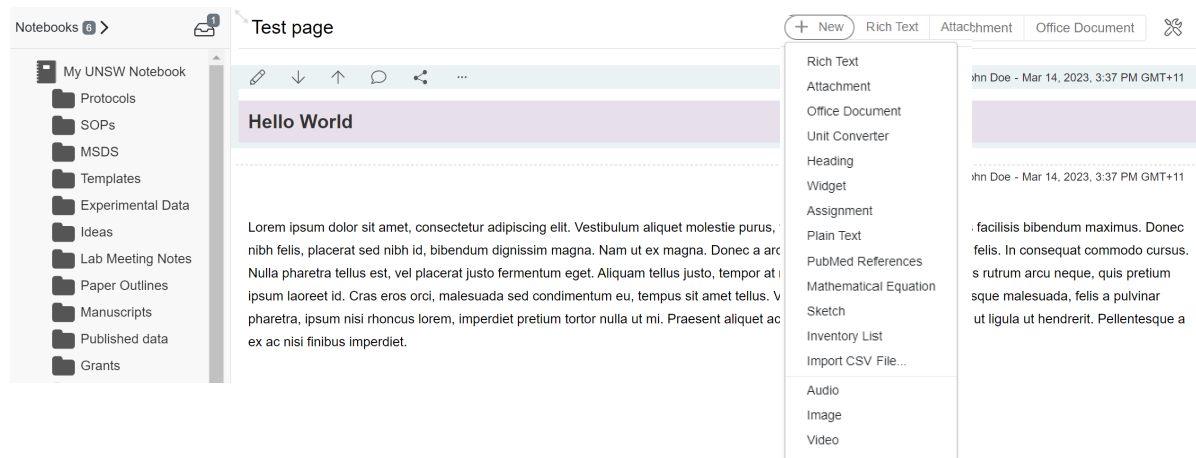

## How:

- <https://dataarchive.unsw.edu.au>

**vs.**

The screenshot displays the UNSW eNotebook interface. On the left is a sidebar titled "Notebooks" containing a tree view of folders: "My UNSW Notebook", "Protocols", "SOPs", "MSDS", "Templates", "Experimental Data", "Ideas", "Lab Meeting Notes", "Paper Outlines", "Manuscripts", "Published data", and "Grants". The main area is titled "Test page" and contains a text editor with a toolbar (pencil, arrow, up, down, share, etc.) and a text box containing "Hello World". Below this is a paragraph of Lorem Ipsum text. On the right is a menu with options: "+ New", "Rich Text", "Attachment", "Office Document", and a close icon. A sub-menu is open under "Attachment", listing: "Rich Text", "Attachment", "Office Document", "Unit Converter", "Heading", "Widget", "Assignment", "Plain Text", "PubMed References", "Mathematical Equation", "Sketch", "Inventory List", and "Import CSV File...". Below the menu, a preview of an attachment is shown with a timestamp: "John Doe - Mar 14, 2023, 3:37 PM GMT+11".

# Safe Data, Safe Outputs

Has appropriate and sufficient protection been applied to the data?  
Are the statistical results non-disclosive?

These are more dependant on the data.

UNSW RDM and UNSW library provide some support to UNSW staff and  
UNSW ERICA if used can provide some controls.
