

CADRE 5 SAFES

Coordinated Access for Data, Research and Environments

About ▾

Protocols and PIDs

Work Package 2 (WP2) "Protocols" has kicked off. WP2 involves designing a metadata (information) exchange for the CADRE Platform. Our...

Critical Conjunctions

The Five Safes principles are well documented and are already employed by national statistical agencies in the United Kingdom (Office...

Safe People and Safe Organisations

What we are learning in the CADRE project through our Content and Technical Working Groups is that the relationship between...

Operationalising Five Safes

This month two of the CADRE working groups started discussion on the conceptual and technical dimensions of the Five Safes...

Hello world!

CADRE project kick-off is happening..

CADRE PARTNERSHIP

TALKING POINTS

- Common use of group access management (CILogon)
- Handling groups and projects (activities) in information models
- Standardising terminology across the ecosystem (interoperability)
- Technical policies for identifiers i.e., tokens, unique (dumb & non-system) ID, PIDs
- Privacy impact assessment (managing administrative and technical information across systems)

1. CADRE Five Safes framework

2. Authorisation, group and project information

3. Research workflows (across eResearch ecosystem)

4. Call for community information standards
